Arundo Drives Equitable, Efficient Hiring with CodeSignal

ARUNDO

100% Workforce growth in 18 months

Screened All technical hires with CodeSignal

Challenge

To keep pace with its rapid growth, Arundo needed to double its workforce within 12-18 months. Its greatest need was for technical hires, particularly in data science.

Solution

Arundo implemented CodeSignal Pre-Screen as a top-of-funnel screening tool for its technical candidates. With its validated questions, advanced IDE, and ATS integration, Pre-Screen helped Arundo use data to make more equitable hiring decisions—and to make them quickly and at scale.

Results

Arundo **screened all of their technical hires with CodeSignal**, helping them **grow their workforce by 100% in 18 months** by quickly identifying highly-skilled, diamond-in-the-rough candidates.

Talk to an expert today and explore how you can improve your technical recruiting process. Email sales@codesignal.com or visit codesignal.com/demo.

CodeSignal has allowed us to really level the playing field for all of our inbound candidates, and it gives us additional insight beyond your traditional coding test. We're able to look back at some of the recordings to better understand our candidates' problem-solving process.
