

Make the right hires faster with CodeSignal + Ashby

Streamline your hiring with CodeSignal's assessments and tech interviews—now fully integrated with Ashby. Eliminate manual steps, boost collaboration, and keep everything in one place.

Why teams love the collaboration:

Centralized Workflow

Send CodeSignal assessments and interviews straight from Ashby—no toggling between tools.

Faster Hiring Decisions

Access results instantly in Ashby to evaluate candidates quickly and confidently.

Seamless Collaboration

Share results across hiring teams—without leaving your ATS or requiring collaborators to learn another system.

1 Invite candidates

Send CodeSignal assessment or interview links directly from Ashby.

2 Automate notifications

Stay updated when candidates complete assessments or interviews.

3 Review results

Access performance data and insights—without leaving Ashby.

4 Collaborate & hire

Share findings with your team and move fast on top talent.

The screenshot displays the Ashby interface for a candidate named Lawrence Martin. The interface includes a navigation bar with options like Candidates, Activities, Jobs, and Sourcing. Below the navigation bar, there's a section for Lawrence Martin's profile, including a Benchmark Email and a list of tags (Add tags..., Keep warm, Engineering Blog, Full-S). The main content area is divided into two tabs: Activities & Progress and Summary. The Activities & Progress tab is active, showing a list of current activities. One activity is highlighted: CodeSignal Assessment (Simple Node.js test). The details for this assessment are shown in a table below.

Activity	Details
