CodeSignal

General Coding Assessment

Identify qualified early-career engineering talent, quickly and at scale.

The General Coding Assessment (GCA) is a CodeSignal skills assessment for technical hiring and the industry standard for evaluating core programming skills of early-career talent.

Reduce engineering time spent building & maintaining assessments

Screen candidates at scale while reducing time-to-hire

Increase diversity & reduce bias by eliminating resume review

Advance candidates with confidence with CodeSignal's predictive assessment score

Improve candidate experience with assessment results candidates can share widely

1m+
Unique variations of GCA

85%
Candidate completion rate for GCA

3 of 4
Graduating Computer Science majors take the GCA

2k+
CodeSignal assessments completed daily

> CodeSignal is eliminating the manual resume review, it is removing bias, and it is also reducing time-to-hire. This in turn also creates a better candidate experience, because they're able to move through the interview process so much quicker.
