

Streamline Technical Hiring with Greenhouse + CodeSignal

CodeSignal is the most advanced assessment technical interview and assessment platform on the market. From scaling top-of-funnel pre-screens, to optimizing tech screen interviews, to conducting live interviews in a collaborative IDE, CodeSignal empowers companies to make better and more objective hiring decisions, faster. CodeSignal integrates directly with Greenhouse, allowing hiring teams to easily manage their assessment workflow all in one place—start to finish.

1. Invite candidates to CodeSignal Pre-Screen or Tech Screen

Send CodeSignal Pre-Screens & Tech Screens to candidates from Greenhouse

Assign one or more employees to review the results

2. Review the results in Greenhouse

Receive notifications of completed CodeSignal evaluations

View a succinct summary of your candidate's results in Greenhouse

3. Schedule collaborative interview sessions

Generate **onsite interview session links** in Greenhouse

Then, **easily send links** to candidates and interviewers

4. Share and replay coding interviews

Review recorded sessions at any time

Share recorded sessions for easy collaboration with your hiring team

Join industry leading companies already using CodeSignal + Greenhouse
