# CodeSignal

TripActions Optimizes University Recruiting with CodeSignal

Built
A competitive, scalable university recruiting program

Secured
The next generation of top talent quickly

Integrated
Seamlessly with Greenhouse ATS

Challenge

Facing explosive year-over-year growth between 2018 and 2019, TripActions saw the need to create a university recruiting program. They needed an assessment platform —one that could handle the fast pace and high volume inherent to university recruiting while also objectively identifying top talent.

Solution

TripActions adopted CodeSignal Pre-Screen as a top-of-funnel technical skills evaluation tool for their university recruiting program. With validated coding questions, automated scoring, and seamless integration with the Greenhouse ATS, TripActions was able to build a highly effective, highly competitive university recruiting program.

Results

With CodeSignal, TripActions **built a competitive, scalable university recruiting program**, helping them quickly efficiently secure the next generation of talent.

Talk to an expert today and explore how you can improve your technical recruiting process. Email sales@codesignal.com or visit codesignal.com/demo.

I absolutely love how CodeSignal integrates with Greenhouse–being able to see the scores automatically imported, being able to send out batches of tests, is really helpful for our team.
