

Verkada Successfully Scales for Hypergrowth with CodeSignal

Doubled

The size of their engineering team

Reduced

Bias in their overall hiring process

Secured

Top talent quickly, regardless of pedigree

Challenge

In 2019, Verkada entered a phase of hypergrowth. This phase often represents a critical juncture for startups, and Verkada needed a way to scale their technical hiring process quickly and efficiently without overburdening their recruiting and engineering teams.

Solution

Verkada adopted [CodeSignal Pre-Screen](#) to scale the top of its recruiting funnel for all technical positions. With support for more than 40 coding languages, an advanced IDE, and validated Coding Score that's trusted by some of the biggest names in tech, Verkada was able to scale up their pipeline while providing a better experience for recruiters, engineers, and candidates alike.

Results

Verkada **doubled the size of their engineering team** while **reducing bias in their hiring process**, ensuring that they're quickly identifying and securing top talent regardless of pedigree.

Talk to an expert today and explore how you can improve your technical recruiting process. Email sales@codesignal.com or visit codesignal.com/demo.

I typically don't have to look at the resumes, which removes many a bias I would have. We get to send out the test and just get the results, and then from there we get to move forward with the process fast.
